

Pepsico choose REO-PACK automation systems

Pepsico have chosen a REO-PACK fully automatic stretchwrapping system for the Walkers Snack Foods factory at Skelmersdale. The system comprises of an S3000 stretchwrapper together with pallet lifts and conveyors and is capable of wrapping 80 pallets per hour.

Skelmersdale will be the 6th UK Pepsico site with a REO-PACK fully auto wrapper in a series going back to 2003. The choice is testament to the systems performance and ability to reliably and economically wrap pallets in a high volume production environment
